Solar Corporate Travel Case

Solar Technology charges cell phones, iPods & the iPhone with high efficiency.

Description

V-Dimension introduces the Optical Corporate Travel Case. The Optical is a truly innovative product that will forever change the way the corporate world uses their bags. The Case utilizes patented light optimizing technology which allows you to conveniently charge your iPods, cell phones, iPhone and PDAs with high efficiency.

With each year that passes, members of the corporate world are becoming increasingly dependant on their cell phones, iPods, iPhone and PDAs. The Optical travel Case will give them the ability to easily keep these devices charged all day in the front pocket of their Case. With this ability comes the peace of mind of knowing that one's cell phone will never die on them when they need it the most.

The Optical optimizes the power of light using only one small solar panel. The Case is designed using durable ballistic 1680 denier nylon. The Optical's toloading case is designed to fit notebooks with up to 15.4" screens. Also featured on the Case are two pen loops, a key clip, multiple accessory compartments, and expandable file sections to keep your documents organized during travel. A small sleeve inside the workstation allows you to secure your small electronic device in the Case while it charges. Additionally, a zippered mesh pocket is also featured to hold the Case's technology. The Optical travel Case will ensure that business people will never find themselves out of touch or out of tune again.

The Optical is your alternative energy solution to keep your electronic devices fully charged.

Praise

"For anyone on the go who doesn't have access to an electrical outlet, this V-Dimension Case is a smart move" –Ch. 9 News, Los Angeles

"As you make your way around during the busy day your V-Dimension solar powered bag keeps everything topped off" –TechNow

Specifications

Solar Panel

- Panel Dimensions: 4.5" x 5.75"
- Weight: 1.5 oz.
- Substance Type: 2mm plastic/aluminum
- Cell Type: Monocrystalline
- Cell Efficiency: 17.6%
- Open Circuit Voltage: 6.25 V
- Peak Current: 300 mA
- Peak Watt: 1.8 W
- Enough to charge most portable electronics (Does not charge laptops)

Battery Pack

- Output Voltage: 5 V
- Output Capacity: 2200 mHa
- Output Current: 700 mA
- Charge Time: USB or wall outlet 3 Hrs, Solar Charge 7 Hrs
- Battery Type: Ni-MH
- Weight: 4 oz
- Dimensions: 3.25" x 3" x 1"
